SUMMARY

My primary research interest lies in optimizing KV Cache pipelines for LLM inference, with a current focus on designing storage I/O scheduling algorithms to minimize latency. Driven by a passion for system-level efficiency, I aim to expand my expertise toward scalable, high-performance system architectures that support next-gen AI.

EDUCATION

Gyeongsang National University | B.S., Engineering — **Jinju, Korea | Mar. 2023 – Ongoing**
GPA : 4.xx/4.5 (TBD)
B.S. in Aerospace and Software Engineering

EXPERIENCES

Big Data System Software lab
Research Intern — **Jinju, Korea | Jun. 2024 – Ongoing**
Topics: System Software, Storage System, Machine Learning, OS
Supervisor: Prof. Jaeho Kim

Publications & Presentations

[Faster SSD Failure Prediction with Transformer Architecture using SMART Attributes] *KSC, 2025*
Jobeda Khanam Lia, ***Junhyeok Jeong***, Jaeho Kim
[Poster: Analyzing I/O Characteristics and Latency in Storage-based LLM Inference] *KCS, 2026*
Junhyeok Jeong, Munseok Choe, Jaeho Kim
[Semantic-Aware I/O Isolation Scheduling for VLA Inference in Edge Environments] ***selected as an excellence paper !*** *ISET, 2026*
Junhyeok Jeong, Jaeho Kim
[Poster: Semantic-Aware Flushing for VLA Inference] *NVMSA, 2026*
Junhyeok Jeong, Jaeho Kim

Honors and Awards

Presidential Science Scholarship
Ministry of Science and ICT / National Research Foundation of Korea 2026

Excellence Paper Award **[Semantic-Aware I/O Isolation Scheduling for VLA Inference in Edge Environments]**
The 21th IeMeK Symposium on Embedded Technology (ISET 2026)

Dean-selected Scholarships
Seven successive semesters (2023 Spring - ongoing)

Best Buddy Mentors
Exchange Student Program of Gyeonsang National University (2025 Spring)

Skills

Languages
Korean: Native
English: Advanced
- OPIc Advanced Low | Feb 2026
- TOEIC 890/990 | April 2024

Technincal Skills

- Coding Languages: Python, C
- Frameworks & Tools: PyTorch, bpftrace, FlexGen
